PROFILE

Software Engineer & Flutter Developer with 2+ years of experience designing, developing, and shipping production mobile applications published on **Google Play** and the **App Store**. Specialized in building scalable solutions for **SaaS, E-commerce, CRM, and B2B platforms** using **Flutter, Dart, and clean architecture**. Strong focus on **performance optimization, code quality, and user experience**. Proven ability to translate business requirements into technical solutions, collaborate with cross-functional teams, and deliver reliable production-ready systems in Agile environments.

PROFESSIONAL EXPERIENCE

- AMAMI — Business Services** Egypt
Mobile Applications Developer Dec 2025 – Present
 - Missing Board App (Live):** Built a lost-and-found platform published on **Google Play** and **App Store**, featuring interactive map-based ad browsing, multi-image uploads, category filtering, and real-time push notifications.
 - Mini Market App (Live):** Developed and shipped **Mini Market** — a local shopping and delivery platform published on **Google Play** and **App Store**, featuring real-time order tracking, in-app chat with voice messages, location-based delivery, and multi-language support (English & Arabic).
 - SaaS & B2B Systems:** Contributing to large-scale **SaaS mobile applications** supporting E-commerce and business service workflows. Implemented **B2B system integrations** with partner companies, reducing manual processes by approximately **25%**.
 - Architecture & Scalability:** Applied **clean architecture** and **BLoC state management** to reduce code complexity and improve scalability across multiple modules.
 - Performance Optimization:** Optimized application performance and API consumption, reducing average screen load time by approximately **20%**.
 - Code Quality:** Refactored legacy codebases and introduced reusable components, reducing duplicated code by nearly **35%**. Delivered **10+ production features** across multiple SaaS modules.
 - Cross-functional Collaboration:** Worked closely with backend engineers, product managers, designers, and QA teams to deliver features on time within Agile sprints.
- Rockai Dev** Alexandria, Egypt
Flutter Developer Aug 2025 – Dec 2025
 - Propai CRM App (Live):** Developed **Propai CRM** — an AI-powered real estate CRM application published on **Google Play** and **App Store**, featuring role-based access control, automated workflows, real-time analytics dashboards, detailed insightful reports, and AI-driven predictive actions to improve conversion rates.
 - E-commerce Development:** Built Flutter-based E-commerce applications with secure payment gateways (transaction success rate above **98%**), supporting **1,000+ users** and real-time order tracking.
 - State Management & Architecture:** Implemented **BLoC architecture**, improving application stability and reducing runtime bugs by approximately **30%**. Reduced new-feature development time by **25%** through improved patterns and code structure.
 - Cloud Services:** Integrated Firebase and Supabase for authentication, real-time data synchronization, and backend services, increasing system reliability.
 - Bug Resolution & Quality:** Resolved **50+ production bugs** reported during QA and post-release, improving app stability and user ratings.
 - Agile Delivery:** Participated in sprint planning, code reviews, and Agile ceremonies, contributing to consistent and on-time feature delivery.

EDUCATION

- **Tanta University**
Bachelor's Degree in Computer Science

Tanta, Egypt
Aug 2021 – Dec 2024

TECHNICAL SKILLS

Programming Languages: Dart, Java

Mobile Development: Flutter, Android Development, Cross-Platform Development

State Management: BLoC, Cubit, Provider

Backend & APIs: RESTful APIs, JSON, API Integration, WebSockets

Cloud Services: Firebase (Auth, Firestore, Cloud Functions, FCM), Supabase

Real-Time Features: In-App Chat, Voice Messaging, Push Notifications, Live Tracking

Maps & Location: Google Maps SDK, Geolocation, Location-Based Services

Databases: Hive, SQLite

Architecture & Practices: Clean Architecture, MVVM, OOP, SOLID, Modularization

Testing & Quality: Unit Testing, Debugging, Performance Profiling

Payments: Secure Payment Gateway Integration

Localization: Multi-Language Support (Arabic & English), RTL Layout

CI/CD & Tools: Git, GitHub Actions, Postman, Android Studio, VS Code

Soft Skills: Problem Solving, Analytical Thinking, Communication, Cross-functional Collaboration, Time Management, Ownership, Adaptability, Attention to Detail
